

### **1. Why is financial performance evaluation important for IT businesses?**

It helps IT businesses know if they are making money or losing it. This way, they can make smart choices to grow and avoid wasting money.

### **2. How does the Balanced Scorecard technique improve IT performance assessment?**

The Balanced Scorecard looks at more than just money. It checks things like customer satisfaction, internal processes, and learning. This gives a full picture of how the business is doing.

### **3. What are some key metrics used in the Balanced IT Performance Evaluation Technique?**

- Customer satisfaction
- Project completion time
- Revenue or profit
- Employee skills or training levels

### **4. How can businesses effectively manage KPIs in IT operations?**

They can set clear goals, track progress regularly, use tools to monitor data, and adjust plans when needed. This helps keep work on track and improves results.

### **5. What role does a Goal Management System play in IT business performance?**

It helps teams set clear goals, stay focused, and work better together. This leads to better performance and faster progress.
